

~Developmental Screening Age Ranges for Critical Ages~

9 month screening

...Any screening conducted between the ages of 8 and 12 months

18 month screening

...Any screening conducted between the ages of 13 and 18 months

24 month screening

...Any screening conducted between the ages of 19 and 24 months

30 month screenings

...Any screening conducted between the ages of 19 and 36 months (if a 24 month screening is NOT conducted)

...Any screening conducted between the ages of 25 and 26 months (if a 24 month screening IS conducted)

NOTE: *Please use the age appropriate screening questionnaire based on the child's age, NOT the critical age of the screening. For example, if a child misses his/her 9-month screen and comes in for a 12-month visit then the 12-month questionnaire should be used and will be counted toward the 9-month screening.*
